

## Avtron M6C Hazardous Area Encoder

**Explosion Protected ATEX Zone 1,  
IECEx Zone 1, Magnetic Hollow Shaft  
Mount Encoder, 1" to 1 1/8"**

### Explosion-Proof Magnetic Encoder

Explosion Protected

ATEX & IECEx Zone 1 Rated

Up to 1200 PPR

Severe Mill Duty

Immune to dust, water, oil, etc.

Does not require intrinsic safety barriers

Withstands extreme shock and vibration

Protected against wiring errors

Excellent for oil and gas drilling applications

### M6C

Avtron M6C explosion protected ATEX and IECEx rated severe mill duty rotary encoders are designed for direct mounting on motor or load shafts, from 1" to 1 1/8" [25-30mm]. Other models available include no-bearing units such as XR5, XR56A and XR850, shafted models including XR4F and XR485, and hollow shaft models including XR45 and XR685. These models also include ATEX, IECEx, UL, cUL, NEC and CSA ratings.

The M6C is an updated model which directly replaces the M6 encoder, and M6C adds IECEx certification. No barrier or isolator is required-mount M6C directly in any ATEX or IECEx Zone 1 application.

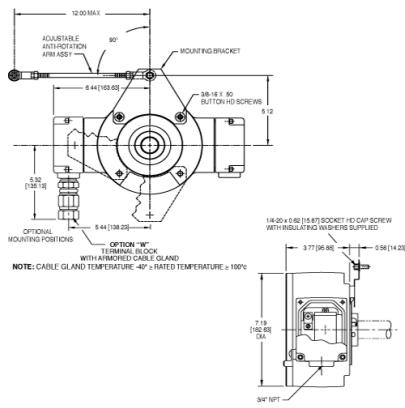

Why take a chance with weak optical encoders on your drilling rig? The M6C features Avtron Encoders' rugged magnetic sensor and solid metal rotor technology. Our shatterproof, moisture proof systems ensure your application has maximum uptime. The hollow shaft (tethered) models offer direct mounting on shafts from 1" to 1 1/8", without flanges, reducers, couplings, or other hardware. No rework is needed; just mount the encoder directly on the shaft, and secure the tether arm. The heavy duty bearings withstand runout and vibration that destroy lesser encoders.

M6C also includes a complete wiring protection system--it can survive all types of wiring errors and drive signals down the longest cables.

For more information on keeping your rotary encoders working in oil and gas applications, visit our oil and gas blog.

We believe explosion protected encoders should also be ready to withstand the rough drilling environment. Try the M6C today!

## OUTLINE DRAWING

## MORE M6C ADVANTAGES

- Threaded rod torque arm for easy tethered mounting
- Highly resistant to electrical and magnetic motor and brake noise
- Second isolated output may be different PPR
- Available armored wire gland
- IP66 Enclosure
- 1 Year No-Hassle Warranty

## MORE M6C SPECIFICATIONS

**Operating Power:** Volts: 5-24 VDC; Current: 120mA, no load

**Output Format:** A, /A, B, /B; Optional Marker Z, /Z

**Frequency Range:** 0 to 250 kHz @ 6 V & 1 meter cable

**PPR:** 240-1200

**Speed:** 5000 RPM Max. Std.

**Temperature:** 80°C to -40°C (-40°C optional, -20°C standard)

**Chemical:** Polyurethane enamel paint protects against salt spray, mild acids, and bases

**Enclosure Rating:** IP66

**Explosion Protection:**

ATEX 0539 II 2 G Ex d e IIB T4 Gb

(Tamb = -40/-20°C to +80°C)

IECEx Ex d e IIB T4 Gb

(Tamb = -40/-20°C to +80°C)

**Weight:** 18 lbs. / 8kg.

All dimensions are in inches [millimeters].
