

Avtron AV44 Encoders

Heavy Mill Duty Magnetic Shafted Encoder, B10 and PY Flange Options

Magnetic Durability in a Compact Encoder

Simple Installation

Up to 10000 PPR

Replaces Competitive Models without Rewiring

High Power Outputs Standard

-40°C to +100°C Operation

Fully Insulated from Motor Shaft Currents

2 Year No-Hassle Warranty

No Fragile Optics, No Glass Disks

Cast Aluminum Heavy Duty Housing

UL Listed; CE Compliant

AV44

The AV44 is a rugged heavy mill duty incremental solid shaft encoder that offers excellent signal quality with modern drives. AV44 carries forward Avtron Encoders' DNA of ensuring uptime with sturdy construction the durability of magnetic sensing and resistance to environmental contaminants.

Avtron AV44 encoders offer an 11mm shaft with a "B10 Euroflange" and a 5/16" shaft with "PY" flange, or the option to foot-mount for a wide range of industrial applications. The AV44 is a drop-in replacement for Baumer Hubner POG 9 & 10 models, as well as Leine & Linde 560 & 855 models. And it adds superior durability and diagnostics!

The AV44 includes high power outputs that can drive cables up to 1000' [300m] with full short circuit and over-voltage protection!

On-board diagnostics check all aspects of the encoder - from the sensor to the output line driver circuit - and provide a clear indicator that the encoder is working well. No more fumbling with a PC or oscilloscope to determine if your encoder is working properly!

Avtron AV44 encoders have superior shaft seals and bearings that stay sealed to keep out contamination caused by temperature cycling and liquid sprays. Often, competitors optical encoders fail because of dust or water contamination that prevents the sensor from seeing the optical disk. The AV44 advanced magnetic technology sees through contamination ignoring water, oil, dust and dirt. This ensures your machine keeps working, even in the toughest application environments.

Select an Avtron AV44 and upgrade your machine today!

OUTLINE DRAWING

MORE AV44 ADVANTAGES

- All digital design; no adjustments or potentiometers required
- Fits European and North American generators and motors B10 Euroflange faces and PY faces
- Diagnostic LED & alarm output contact option
- Grounding (earthing) strap and custom length Anti-Rotation Arms available

MORE AV44 SPECIFICATIONS

Operating Power: Volts: 6-30 VDC; Current: 80mA, no load

Output Format: A Quad B with marker (A,/A, B,/B, Z,/Z)

Frequency Range: 0 to 250 kHz @6V & 1m cable

PPR: 1 - 10000 standard (for other PPR needs, consult factory)

Speed: 6000 RPM Max., (for higher speeds, consult factory)

Temperature: -30° to 85°C std, *optional: -40° to 100°C

Environmental: IP66 housing

Vibration: 10-2000Hz, 17Gs

Shock: 275G, 6mS duration

Axial Bearing Load: 500 N

Radial Bearing Load: 1200 N

Weight: 2.5 lbs. [635 g] approx

Certifications: CE, UL

Warranty: 2 Year No-Hassle
